1	Free radicals, reactive oxygen species, oxidative stress and its classification. Lushchak V.I. <i>Chemico-Biological Interactions</i> , 2014, 224,164-175.	257	463
2	Adaptive response to oxidative stress: Bacteria, fungi, plants and animals. Lushchak V.I. <i>Comparative Biochemistry and Physiology Part C: Toxicology & Pharmacology</i> , 2011, 153(2), 175-190.	243	406
3	Free radical oxidation of proteins and its relationship with functional state of organisms. Lushchak V.I. <i>Biochemistry (Moscow)</i> 2007, 72(8), 809-827.	82	145
4	Calix[4]arene methylenebisphosphonic acids as calf intestine alkaline phosphatase inhibitors. Vovk A.I. , Kalchenko V.I., Cherenok S.A., Kukhar V.P., Muzychka O.V., Lozynsky M.O. <i>Organic and Biomolecular Chemistry</i> , 2004, 2 (21), 3162-3166.	77	95
5	Эндокринология. Боднар П.Н., Михальчишин Г.П., Комиссаренко Ю.И. , Приступюк А.М. Винница: Нова книга, 344, 2007 (є розділ, присвячений вітамінам).	-	74
6	Tocopherol biosynthesis: Chemistry, regulation and effects of environmental factors. Lushchak V.I. , Semchuk N.M. <i>Acta Physiologiae Plantarum</i> , 2012, 34(5), 1607-1628.	51	69
7	Fructose and glucose differentially affect aging and carbonyl/oxidative stress parameters in <i>Saccharomyces cerevisiae</i> cells. Semchyshyn H.M., Lozinska L.M., Miedzobrodzki J., Lushchak V.I. <i>Carbohydrate Research</i> , 2011, 346(7), 933-938.	36	50
8	Inhibition of Yersinia protein tyrosine phosphatase by phosphonate derivatives of calixarenes. Vovk A.I. , Kononets L.A., Tanchuk V.Yu., Cherenok S.O., Drapailo A.B., Kalchenko V.I., Kukhar V.P. <i>Bioorganic and Medicinal Chemistry Letters</i> , 2010, 20(2), 483-487.	36	45
9	<i>Drosophila melanogaster</i> larvae fed by glucose and fructose demonstrate difference in oxidative stress markers and antioxidant enzymes of adult flies. Lushchak O.V., Rovenko B.V., Gospodaryov D.V., Lushchak V.I. <i>Comparative Biochemistry and Physiology Part A: Molecular & Integrative Physiology</i> , 2011, 160(1), 27-34.	36	45

10	Balance between macronutrients affects lifespan and functional senescence in fruit fly <i>Drosophila melanogaster</i> . Lushchak O.V. , Gospodaryov D.V., Rovenko B.M., Glovya A.D., Yurkevych I.S., Klyuba V.P., Shcherbij M.V., Lushcha V.I. <i>Journals of Gerontology Series A: Biomedical Sciences and Medical Sciences</i> , 2012, 67(2), 118-125.	33	39
11	High sucrose consumption promotes obesity whereas its low consumption induces oxidative stress in <i>Drosophila melanogaster</i> . Rovenko B.M., Kubrak O.I., Gospodaryov D.V., Perkhulyn N.V., Yurkevych I.S., Sanz A., Lushchak O.V., Lushchak V.I. <i>Journal of insect physiology</i> , 2015, 79, 42-54.	33	39
12	Specific dietary carbohydrates differentially influence the life span and fecundity of <i>Drosophila melanogaster</i> . Lushchak O.V., Gospodaryov D.V., Rovenko B.M., Yurkevych I.S., Perkhulyn N.V., Lushchak V.I. , <i>Journals of Gerontology Series A: Biomedical Sciences and Medical Sciences</i> 2014, 69(1), 3-12.	26	38
13	Modified coumarins. 27. Synthesis and antioxidant activity of 3-substituted 5, 7-dihydroxy-4-methylcoumarins. Garazd M. M., Muzychka O. V., Vovk A. I. , Nagorichna I. V., Ogorodniichuk A. S. <i>Chemistry of Natural compounds</i> , 2007, 43(1), 19-23.	25	36
14	High consumption of fructose rather than glucose promotes a diet-induced obese phenotype in <i>Drosophila melanogaster</i> . Rovenko B.M., Perkhulyn N.V., Gospodaryov D.V., Sanz A., Lushchak O.V., Lushchak V.I. <i>Comparative Biochemistry and Physiology Part A: Molecular & Integrative Physiology</i> , 2015, 180, 75–85.	25	33
15	Molecular mechanisms of the non-coenzyme action of thiamin in brain: biochemical, structural and pathway analysis. Mkrtchyan G., Aleshin V., Parkhomenko Y. , Kaehne T., Luigi Di Salvo M., Parroni A., Contestabile R., Vovk A. , Bettendorff L., Bunik V. <i>Scientific reports</i> , 2015, 5, 12583.	24	43
16	Thiamine deficiency caused by thiamine antagonists triggers upregulation of apoptosis inducing factor gene expression and leads to caspase 3-mediated apoptosis in neuronally differentiated rat PC-12 cells. Chorny S., Parkhomenko J. , Chorna N. <i>Acta Biochim. Pol.</i> , 2007, 54 (2), 315-322.	23	26
17	Kinetics of oxidation of vitamin B-1 and its O-acyl analogs with ferricyanide. A mechanistic model of thiamin-binding protein. Vovk A.I. , Murav'eva I.V., Kukhar V.P., Baklan V.F. <i>Russian Journal of General Chemistry</i> , 2000, 70 (7), 1108-1112.	22	30
18	Classification of oxidative stress based on its intensity. Lushchak V.I. <i>EXCLI Journal</i> , 2014, 13, 922-937.	22	31
19	The golden root, <i>Rhodiola rosea</i> , prolongs lifespan but decreases oxidative stress resistance in yeast <i>Saccharomyces</i>	20	26

	<i>cerevisiae</i> . Bayliak M.M., Lushchak V.I. <i>Phytomedicine</i> . 2011, 18(14), 1262-1268.		
20	Antioxidant and antiradical activities of resorcinarene tetranitroxides. Vovk A. I. , Shivanyuk A. M., Bugas R. V., Muzychka O. V., Melnyk A. K. <i>Bioorganic and medicinal chemistry letters</i> , 2009, 19(5), 1314-1317.	19	23
21	Free radicals, reactive oxygen species, oxidative stresses and their classifications. Lushchak V.I. <i>Ukrainian Biochemical Journal</i> , 2015, 87(6), 11-18.	19	44
22	Calix[4]arene methylenebisphosphonic acids as inhibitors of protein tyrosine phosphatase 1B. Trush V.V., Cherenok S.O., Tanchuk V.Y., Kukhar V. P., Kalchenko V. I., Vovk A.I. <i>Bioorganic and Medicinal Chemistry Letters</i> , 2013, 23(20), 5619-5623.	19	23
23	Stereoselectivity of binding of α -(N-benzylamino)benzylphosphonic acids to prostatic acid phosphatase. Vovk A.I. , Mischenko I.M., Tanchuk V.Yu., Kachkovskii G.A, Sheiko S.Yu., Kolodyazhnyi O.I., Kukhar V. P. <i>Bioorganic and Medicinal Chemistry Letters</i> . 2008, 18(16), 4620-4623.	19	22
24	Effects of sterols having different chemical structure and squalene on osmotic resistance of erythrocytes. Ivashkevich S.P., Apukhovskaya L.I. Vendt V.P. <i>Biochemistry (Moscow)</i> , 1981, 46(8), 1420-1425.	19	23
25	Dissection of the Hormetic Curve: Analysis of Components and Mechanisms. Lushchak V.I. <i>Dose-Response</i> , 2014, 12(3) 466–479.	14	26
26	Thiacalix[4]arene as molecular platform for design of alkaline phosphatase inhibitors. Vovk A.I. , Kononets L.A., Tanchuk, V.Y., Drapailo A.B., Kalchenko V.I., Kukhar V.P. <i>Journal of Inclusion Phenomena and Macrocyclic Chemistry</i> . 2010, 66(3), 271-277.	15	24
27	Метаболизм витамина D ₃ , введенного в липосомах, в печени крыс. Апуховская Л.И. , Хрестовая Н.Л., Антоненко Л.В. <i>Украинский биохимический журнал</i> , 1991, 63(5), 89-94.	0	17
28	Витамин D и костная система. Гайко Г.В, Калашников А.В., Бруско А.Т., Апуховская Л.И. - К.: Книга плюс, 2008.	0	17
29	Functional and regulatory properties of p70S6 kinase β . Valovka T.I., Filonenko V.V., Palchevsky S.S., Velikiy M.M. , Drobot L.B., Waterfield M., Matsuka G. Kh., Gout I.T. <i>Biopolymers and Cell</i> . 1999, 15 (5), 415-421.	3	16
30	Chronic alcoholism in rats induces a compensatory response, preserving brain thiamine diphosphate, but the brain 2-oxo acid dehydrogenases are inactivated despite unchanged coenzyme levels. Parkhomenko Y.M. , Kudryavtsev P.A., Pylypchuk S.Y., Chekhivska LI, Stepanenko SP, Sergiichuk A.A., Bunik V.I. <i>Journal of Neurochemistry</i> 2011, 117(6), 1055-1065.	13	16

31	Biochemical markers of bone collagen type I metabolism. Zaitseva O.V., Shandrenko S.G., Veliky M.M. <i>Ukrainian Biochemical Journal</i> , 2015, 87 (1), 21-32.	8	15
32	Separation of thiamine phosphoric esters on sephadex cation exchanger. Parkhomenko J.M. , Rybina A.A., Khalmuradov A.G. <i>Methods in Enzymology</i> , 1979, 62(C), 59-63.	9	13
33	Classification of binding site conformations of protein tyrosine phosphatase 1B. Tanchuk V. Y., Tanin V. O., Vovk A.I. <i>Chemical biology & drug design</i> , 2012, 80(1), 121-128.	17	17
34	Vitamin D ₃ protects against prednisolone-induced liver injury associated with the impairment of the hepatic NF-κB/iNOS/NO pathway. Lisakovska O., Shymanskyi I., Mazanova A., Khomenko A., Veliky M. <i>Biochemistry and Cell Biology</i> , 2017, 95 (2), 213-222.	7	12
35	Phosphonate monoesters on a thiacalix[4]arene framework as potential inhibitors of protein tyrosine phosphatase 1B. Trush V.V., Kharchenko S.G., Tanchuk V.Y., Kalchenko V.I., Vovk A.I. <i>Organic and Biomolecular Chemistry</i> , 2015, 13(33), 8803-8806.	6	11
36	Characteristic metabolic disturbances in the rat tissues caused by long-term use of alcohol. Parkhomenko Yu.M. , Donchenko G.V., Pylypchuk S.Yu., Stepanenko S.P., Chekhovskaia L.I., Klimenko E.P. <i>Ukrain'skyi Biokhimichnyi Zhurnal</i> , 2007, 79(3), 61-69.	2	15
37	Історія розвитку ендокринології в Україні. Тронько М.Д., Боднар П.М., Комісаренко. Ю.І. К.: Здоров'я, 2004.	0	14
38	Витамин D и его роль в обеспечении здоровья детей и беременных женщин. Лукьянова Е.М., Антипкин Ю.Г., Омельченко Л.И., Апуховская Л.И. Эксперт, 2005	-	14
39	Вітаміни в здоров'ї людини. Пархоменко Ю.М. , Донченко Г.В. Київ.-Академперіодика. -2006.-182с.	-	15
40	Na ⁺ /H ⁺ -exchanger-1 inhibition counteracts diabetic cataract formation and retinal oxidative-nitrative stress and apoptosis/ Lupachyk S., Stavniichuk, R., Komissarnko J.I. , Drel, V.R., Obrosova A.A., El-Remessy A.B., Pacher P., Obrosova I.G. <i>International Journal of Molecular Medicine</i> , 2012, 29(6), 989-998.	7	13
41	Role of PARP and protein poly-ADP-ribosylation process in regulation of cell functions. Shymans'kyi I.O., Sybirna N.O., Velykyi M.M. <i>Ukrains'kyi biokhimichnyi zhurnal</i> , 1999, 83 (6), 5-34.	4	10
42	The neural activity of thiamine: facts and hypotheses. Parkhomenko Iu.M. , Donchenko G.V., Protasova Z.S. <i>Ukrainskii biokhimicheskii zhurnal</i> , 1996, 68 (2), 3-14.	7	9
43	Characteristics of thiamine triphosphatase from neural cells plasma membranes. Sidorova A.A., Stepanenko S.P., Parkhomenko Iu.M. <i>Ukrains'kyi biokhimichnyi zhurnal</i> , 2009, 81 (3), 57-65.	8	9
44	Comparative characteristic of thiamine antagonists on	6	11

	apoptosis induction in different types of nerve cell lines. Chorny S.A., Parkhomenko Y.M. <i>Ukrains'kyi biokhimichniy zhurnal</i> , 2008, 80, 76-84.		
45	Oxidized derivatives of thiamine: Formation, properties, biological role. Parkhomenko Yu.M. , Stepuro I.I., Donchenko G.V., Stsiapura V.I. <i>Ukrain'skyi Biokhimichniy Zhurnal</i> , 2012, 84(6), 5-24.	7	9
46	Existence of two different active sites on thiamine binding protein in plasma membranes of synaptosomes. Parkhomenko Iu.M. , Strokina A.A., Pilipchuk S.I., Stepanenko S.P. <i>Ukrains'kyi biokhimichniy zhurnal</i> , 2010, 82(1), 34-41.	7	9
47	Isolation and various properties of thiamine-binding protein from synaptosomes in the rat brain. Postoenko V.A., Parkhomenko Iu.M. , Vovk A.I., Khalmuradov A.G., Donchenko G.V. <i>Biokhimiya</i> , 1987, 52(11), 1792-1797.	7	12
48	Violations of electrostatic balance in erythrocyte-membranes with experimental d-hypovitaminosis. Kholodova Y.D., Apukhovskaya L.I. , Bondar O.P., Vendt V.P., Ivashkevich S.P. <i>Ukrains'kyi biokhimichniy zhurnal</i> , 1980, 52(5), 597-603.	1	1
49	Role of PARP and protein poly-ADP-ribosylation process in regulation of cell functions. Shymans'kyi I.O., Sybirna N.O., Velykyi M.M. <i>Ukrains'kyi biokhimichniy zhurnal</i> , 2011, 83 (6), 5-34.	4	10
50	Hydrophobic nitroxyl radicals inhibit linoleyl alcohol oxidation by 5-lipoxygenase. Vovk A.I. , Kharchenko O.V., Kharitonenko A.I., Kukhar V.P., Babii L.V., Kazachkov M. G., Melnyk A.K., Khilchevsky A. N. <i>Russian Journal of Bioorganic Chemistry</i> , 2004, 30(4), 391-395.	2	10
51	Effects of vitamin D3 and vitamin E on prednisolone-induced alterations of phagocyte function. Shymanskyi I.O., Lisakovska O.O., Mazanova A.O., Riasniy V.M., Veliky M.M. <i>European Review for Medical and Pharmacological Sciences</i> , 2016, 20(7), 1379-83.	3	1
52	Nicotinamide coenzymes in the regulation of cellular metabolism in various types of diabetes. Veliky N.N. , Obrosova I.G., Efimov A.S., Babicheva E.I., Sokil O.P. <i>Voprosy Meditsinskoj Khimii</i> , 1992, 38(4), 45-52.	5	6
53	Vitamin D ₃ availability and functional activity of peripheral blood phagocytes in experimental type 1 diabetes. Labudzynskiy D.O., Shymanskyi I.O., Riasnyi V.M., Veliky M.M. <i>Ukrain'skyi Biokhimichniy Zhurnal</i> , 2014, 86(2), 107-118.	4	4
54	To the 20th anniversary of the Chernobyl accident study of vitamin status and provision with micro-and macroelements of limited groups of people at different time periods since the accident at Chernobyl nuclear power plant. Spirichev V.B., Donchenko G.V., Blazhevich N.V., Parkhomenko Iu.M. at al. <i>Ukrains'kyi biokhimichniy</i>	4	5

	<i>zhurnal</i> , 2006, 78 (2), 5-26.		
55	Mechanisms responsible for the high sensitivity of neural cells to vitamin B ₁ deficiency. Parkhomenko Y.M. , Pavlova A.S., Mezhenkaya O.A. <i>Neurophysiology</i> , 2016, 48(6), 429-448.	4	6
56	Antioxidant activity of thiamine and its structural analogs in reactions with electrochemically generated hydroxyl radicals and hydrogen peroxide. Shapoval G.S., Babii L.V., Kruglyak O.S., Vovk A.I. <i>Theoretical and experimental chemistry</i> , 2011, 47(1), 55-60.	3	4
57	Thiamine effect on the pyruvate-dehydrogenase complex activity in the rat-liver under lipogenesis intensifications. Parkhomenko Y.M., Vovk A.I., Protasova Z.S. et al. <i>Ukrainskii Biokhimicheskii Zhurnal</i> , 1983, 55(4), 408-414.	1	1
58	Localization of thiamine-binding protein in synaptosomes from the rat brain. Parkhomenko Y.M., Protasova Z.S. , Yanchiy O.R., Khosla K., Donchenko G.V. <i>Neurophysiology</i> , 2001, 33(3), 135-139.	3	4
59	Relative reactivity of thiamine monophosphate and thiamine diphosphate upon interaction with alkaline phosphatase. Vovk A.I. , Babii L.V., Murav'eva I.V. <i>Ukrains'kyi biokhimichnyi zhurnal</i> , 1999, 74(1), 93-96.	1	4
60	Localization of thiamine-binding protein in synaptosomes from the rat brain. Parkhomenko Yu.M., Protasova Z.S. , Yanchiy O.R., Khosla K., Donchenko G.V. <i>Neurophysiology</i> , 2001, 33(3), 135-139.	3	4
61	Влияние новых синтетических производных витамина Е и комплексного витаминного препарата на морфологические признаки эпителия хрусталика <i>in vitro</i> . Метелицына Ю.М., Мальцев Э. В., Кузьменко И. В., Пархоменко Ю. М. <i>Вісник морфології</i> , 2001, 7 (1), 25-27.	3	4
62	Mechanism of hepatoprotective action of methionine and composition "Metovitan" against a background of antituberculosis drug administration to rats. Anisimova S.I., Donchenko H.V., Parkhomenko Iu.M. , Kovalenko V.M. <i>Ukrains'kyi biokhimichnyi zhurnal</i> , 2013, 85(2), 59-67.	2	3
63	Влияние тиаминфосфатов на активность регуляторных ферментов пируватдегидрогеназного комплекса. Пархоменко Ю.М. , Черныш И.Ю., Чурилова Т.И., Халмурадов А.Г. <i>Украинский биохимический журнал</i> , 1987, 59(5), 49-54.	2	3
64	Thiamine Metabolism in Neurons and Their Vital Capacity Upon the Action of Ethanol and Acetaldehyde. Parkhomenko Yu.M. , Donchenko G.V., Chornyi S.A., Yanchiy O.R., Strokina A.O., Stepanenko S.P., Chekhovskaya L.I., Pylypchuk S.Y., Pogorelaya N.K. <i>Neurophysiology</i> , 2014, 46(1), 1-9.	2	2
65	The Role of Vitamin D3 in the Regulation of Mineral Metabolism in Experimental Type 1 Diabetes	2	5

	Labudzynskiy D. O., Lisakovska O. A., Shymansky I. A., Riasnyi V. M., Veliky N.N. <i>Biochemistry Moscow-Supplement Series B – Biomedical Chemistry</i> . 2014, 9(1), 72-78.		
66	The ROS-generating and antioxidant systems in the liver of rats treated with prednisolone and vitamin D ₃ . Shymansky I.O., Khomenko A.V., Lisakovska O.O., Labudzyn's'kyi D. O., Apukhovska L.I., Veliky M.M. <i>Ukrainian Biochemical Journal</i> , 2014, 86(5), 111-125.	4	5
67	Effect of nicotinamide on activity of the antioxidant defensive enzymes in experimental diabetes. Veliky M.M. , Barda V.A., Blront N.K., Ollyarnyk O.D., Veliky A.M. <i>Ukrain'skyi Biokhimichnyi Zhurnal</i> , 1996, 68(2), 109-114.	4	3
68	Inhibition of alkaline phosphatase by thioureido derivatives of methylenebisphosphonic acid. Vovk A.I. , Chuiko A.L., Kononets L.A., Tanchuk V.Y., Murav'eva I.V., Lozinsky M.O., Kukhar V. P. <i>Russian journal of bioorganic chemistry</i> , 2008, 34(1), 60-66.	2	3
69	Investigation of interrelation of the thiamine content, thiamine diphosphate-dependent enzymes activity and reduced glutathione level in the rat-liver. Parkhomenko I.M. , Chernysh I.I., Protasova Z.S., Donchenko G.V. <i>Ukrainskii biokhimicheskii zhurnal</i> , 1990, 62(6), 52-58.	2	2
70	Особливості кальцій-фосфорного обміну у здорових дітей в сучасних умовах та оптимізація методів профілактики його порушень. Квашніна Л.В., Апуховська Л.І. , Родіонов В.П. <i>Перинатологія та педіатрія</i> , 2004, 1, 29-32.	-	10
71	Disturbances in electrostatic balance of erythrocyte membranes in experimental D-hypovitaminosis. Kholodova I.A., Apukhovskaia L. I. , Bondarv O. R., Vendt V. P., Ivashkevich S. P. <i>Ukrainskii biokhimicheskii zhurnal</i> , 1978, 52(5), 597-603.	-	2
72	Влияние стероидов на свойства мембран эритроцитов при экспериментальном рахите. Апуховская Л.И. , Ивашкевич С.П., Вендт В.П. <i>Вопросы медицинской химии</i> , 1979, 25(5), 548-554.	-	8
73	Механизм биологического действия витамина D ₃ : современные представления. Стефанов М.В., Антипкин Ю.Г., Апуховская Л.И. <i>Журнал АМН України</i> , 1996, 2(1), 15.	-	7
74	Activity of pyruvate- and ketoglutarate dehydrogenase complexes in various regions of the rat brain. Rozanov V.A., Parkhomenko Y.M. <i>Ukrainskii Biokhimicheskii Zhurnal</i> , 1987, 59(1), 29-34.	1	1
75	Thiamine: a mechanistic model of interaction with protein. Vovk A.I. , Murav'eva I.V., Parkhomenko I.M. <i>Ukrains'kyi biokhimichnyi zhurnal</i> , 1999, 72(3), 124-132.	1	2
